TECHNICAL SKILLS

n8n · Claude Code · AI Workflows · Canvas LMS · DesignPlus · Cloudflare · JavaScript · React · HTML & CSS · Lua · Java · SQL · PowerShell · REST APIs · Jira · Confluence · Adobe Suite · MS Office

EDUCATION

Bachelor of Information Technology (Co-op Scholarship)

University of Technology Sydney

Graduated Nov 2022

STRENGTHS

Fast Learner · AI Enthusiast · Creative Problem Solver · Startup Mindset

PERSONAL PROJECTS

Saffra Scripts — AI Script Generation Platform

saffrascripts.com

n8n · Claude API · HTML/CSS/JS · Prompt Engineering · Workflow Automation

Solo-built, end-to-end AI platform that generates a full 100-page movie screenplay from six user inputs. Built the live frontend, then designed a multi-step n8n automation backend that re-analyses prompts, structures the full story, and writes the script — emailing the finished screenplay to the user within 24 hours. Live and in use by real users.

EXPERIENCE

Website Designer

Jun 2024 – Present

The King's School — Sydney, Australia

- Design, build, and maintain internal web platforms and digital content for one of Australia's leading independent schools.
- Develop front-end web pages and learning environments within Canvas LMS, leveraging DesignPlus for custom UI components and styling.
- Collaborate with staff to translate content and educational requirements into polished, functional digital experiences.

EUC Engineering Intern

Jan 2022 – Jul 2022

Woolworths Group — SOI EUC Engineering Team

- Supported enterprise end-user computing infrastructure for corporate and BYOD devices across the Woolworths Group.
- Gained hands-on experience with systems administration, endpoint management, and internal IT tooling.
- Collaborated with engineers across seniority levels, building strong technical communication and documentation habits.

Software Development Intern

Jan 2021 – Jul 2021

Channel Nine — 9Now Streaming Platform

- Contributed to the 9Now video streaming service within a fast-paced team working on production-grade deliverables.
- Rapidly onboarded into an unfamiliar codebase, becoming a productive team contributor.
- Strengthened agile teamwork and organisational skills working full-time alongside experienced engineers.
